How the Environmental Protection Agency (EPA) Portfolio Manager benchmarking tool can help you

California state law requires non-residential building owners and operators to disclose a building's benchmarking energy performance score at the time of sale, lease or financing of an entire building.

Topics covered:

- AB1103 - the energy benchmarking law in California
- Web Services where utilities can upload your energy usage data to ENERGY STAR® Portfolio Manager automatically for free
- The ENERGY STAR energy performance scale
- Utility incentive programs to assist in improving a building's energy performance

Learn how to use the Environmental Protection Agency (EPA) ENERGY STAR Portfolio Manager benchmarking tool to benchmark your building. ENERGY STAR Portfolio Manager can help guide investment priorities, identify under-performing buildings, verify energy efficiency improvements and receive EPA recognition for superior performance.

Who Should Attend : Non-residential building owners/managers and real estate professionals.

4 AIA/HSW Learning Units available
